# DROP YOUR WATER USE!

## Tucson is Educating Consumers to Drop their Water Use . . .

The Tucson office of the Arizona Department of Water Resources (ADWR) has developed a new pilot program, **Drop Your Water Use**, to educate retail nursery customers on how to plan and maintain a healthy and water efficient landscape.

The program is a voluntary collaboration between ADWR and local nurseries that uses a simple water drop system to identify plants with similar water requirements. Plants are labeled one through three, distinguished with corresponding water drops and numbers.

All of the labeled plants are Xeriscape plants currently on the Tucson AMA-Low Water Use/Drought Tolerant plant list. The one through three numbering system correlates with the plant list.

- ① **A “number one” indicates very low water use  
mostly native Sonoran and Chihuahuan desert plants,**
- ② **Two is low water use,**
- ③ **Three is moderate water use.**

By choosing plants with the same number a gardener can more successfully group plants by water needs.

Although the plants are all low-water-using, the frequency that they need to be irrigated varies from approximately once a week to once a month after the plants are established (in about 2-3 years). ADWR hopes that consumers will use separate valves on their irrigation system to water each zone and irrigate trees separately, enabling them to manage their irrigation water use more efficiently.

To date, fourteen Tucson retail nurseries and all six Tucson area Home Depot's have signed up for the program. ADWR is working with other nurseries to encourage them to participate. Wholesale nurseries in Phoenix and Tucson are also participating in the program by adding water drop symbols to the labels on plants to be sold in Tucson.

Retail nurseries that participate receive free posters, water drop stickers for their signage and handouts for their customers explaining the program and watering guidelines. In addition all participating nurseries will be listed on the ADWR website and will be promoted in press releases and at community events.

Anyone interested in more information or Tucson nurseries that would like to sign up for the program should contact Christina Bickelmann, Water Conservation Specialist for the Tucson ADWR office @ (520) 770-3816 or email: [cjbickelmann@azwater.gov](mailto:cjbickelmann@azwater.gov)

# LOW WATER USE/DRUGHT TOLERANT PLANT LIST

## OFFICIAL REGULATORY LIST FOR:

### Arizona Department of Water Resources - Tucson Active Management Area Pima County, City of Tucson, Town of Oro Valley, Town of Marana

The plants on this list can be grown in the Tucson area with very low to moderate supplemental irrigation once they are established. Supplemental irrigation should be of sufficient quantity to saturate the plant's root zone. All plants listed can grow with less water than traditional high water use landscape plants and do not require more than the ADWR regulations for low water use plants, a maximum of 18 inches of supplemental irrigation on an annual basis, not including rainfall. In addition to water requirements, other factors (e.g. highly invasive) may be considered to determine acceptability of individual plants for addition to the list. The list provides a wide array of plants to accomplish a variety of low water use landscape designs.

Applications for additions, deletions or exceptions to the list may be submitted to the Department of Water Resources, Tucson Active Management Area Office for consideration. Phone: (520) 770-3800. The list and application forms may be downloaded from the ADWR website at [www.water.az.gov](http://www.water.az.gov)

#### *Key to symbols:*

##### \* Irrigation:

- 1 – Very low, irrigate every 3-4 weeks during the growing season after establishment in 2-3 years
  - 2 – Low, irrigate every two to three weeks during the growing season after establishment in 2-3 years
  - 3 – Moderate, irrigate weekly during the growing season after establishment in 2-3 years
- \* Average annual rainfall for Tucson is 11-12"; in low rainfall years the plants on the list may need additional irrigation to maintain good appearance and plant health.

#### Growing Season:

- Wi winter – apply water September through March; less frequently in off season  
Su summer – apply water March through September; less frequently in off season

#### Plant Type:

A	accent plant	S	shrub
C	cactus	Sc	succulent
Gc	groundcover	T	tree
Gr	ornamental grass	V	vine
An	annual	P	perennial

#### Seasonal Color:

- cl showy flowers, fall color, berries
- (sh) semi-hardy -- some dieback in a hard frost  
(t) tender – severely damaged or killed in a hard frost
- c

#### Allergenicity:

- a strongly allergenic
- b moderately allergenic
- c weakly allergenic

Allergenicity of the plants was classified with the help and advice of Michael J. Schumacher, M.D., Professor, Dept. of Pediatrics and Head, Allergy-Immunology Section, Univ. of Arizona Health Sciences Center and Mark R. Sneller, Ph.D., Office of Pollen and Mold Control, Pima County Health Dept.

#### Native Plants:

- CD Chihuahuan Desert- includes north central and NW Mexico, SW Texas, southern New Mexico and extreme SE Arizona  
SD Sonoran Desert – includes arid and semi-arid areas of NW Mexico, SE California and most of Arizona south of the Mogollon Rim  
Note: Chihuahuan and Sonoran Desert Regions annotated by Matt Johnson, Native Plant Society.

#### *Special Considerations:*

Toxic: may be harmful if eaten. Call Arizona Poison Control Center at 626-6016

Invasive: may spread and intrude into natural and cultivated areas

Spreads in cultivated areas: may spread by seed or sucker in urban or cultivated areas
